Full – Stack Web Development
Bootcamp
2021

PROFESSIONAL OVERVIEW

Solutions Inclined, analytical full stack web developer with experience in design, development, testing and implementation of web applications.

PROJECTS

Courdevelops Oracle <http://oracle.courdevelops.com/>
Organizational App

Django • Python • JavaScript • HTML • CSS • SQLite • Virtual Environment • Bootstrap • Heroku for deployment

- Mobile-first web application designed to centralize all learning material and other record-keeping such as To-Do Lists and Scheduling matters

The Appointment App <http://maryappt.herokuapp.com>
Scheduling App

Django • Python • JavaScript • HTML • CSS • SQLite • Virtual Environment • Bootstrap • Heroku for deployment

- Mobile-first web application created for the gig economy worker that needs fast, streamlined, customized scheduling. This app can create and update appointments. The appointments are color coded depending on type and the info is stored in SQLite.

The Food Pantry App <http://foodbank.herokuapp.com>
Locator App

Django • Python • JavaScript • HTML • CSS • SQLite • Virtual Environment • Bootstrap • Heroku for deployment

- Mobile-first web application created for family members during the covid pandemic to be able to locate local food banks in their area to help out. The app renders data from a restAPI that I created.
